

## Consent for Oral Surgery

I have elected to have an oral surgical procedure. I understand that there are certain inherent and potential risks in any treatment plan or procedure, and that in this specific instance such operative risks include, but are not limited to, the following:

- Post-operative discomfort and swelling that may necessitate several days of home recuperation.
- Bleeding that may be prolonged.
- Post-operative infection, requiring additional treatment, including antibiotic therapy and/or surgery.
- Restricted mouth opening for several days, weeks or longer; injury to the jaw joint (TMJ), which in remote instances, may be permanent and/or require additional treatment.
- Injury to teeth, fillings, and other soft tissues of the mouth, including gums, cheek, palate, lips, throat and tongue.
- Stretching of the corners of the mouth with resultant cracking and bruising.
- Decision to leave a small piece of root in the jaw when its removal would require extensive surgery, or jeopardize other anatomical structures, such as sinuses, nerves, blood vessels, or teeth.
- Jawbone fracture.
- Injury to the nerves underlying the teeth, and the nerve which goes to the tongue, resulting in numbness, tingling, pain or abnormal sensation of the chin, lip, cheek, gums and/or tongue, including loss of taste, on the operated side. This may persist for several weeks, months, or in remote instances, permanently.
- Opening of the sinus (a normal cavity situated above the upper teeth) requiring additional surgery
- Cardiac arrest, heart irregularities or respiratory problems

I understand that during the course of the procedure(s), unforeseen conditions may be revealed that necessitate a change in treatment plan, or additional treatment, in which case the Periodontist will explain to me the change and the reason for it. I authorize the Periodontist to perform treatment, which was not originally planned if the Periodontist deems it is necessary in the exercise of professional judgment.

I understand that NOT treating a pathologic condition could cause problems including but not limited to: cyst or tumor formation; destruction of jawbone and associated structures; injury to the teeth; earaches, headaches, and facial pain; jaw joint problems; sinus, jaw, or facial infection; nerve injury.

Certain medications may cause drowsiness and lack of awareness and coordination, which can be increased by the use of alcohol or other drugs; thus, I have been advised not to operate any vehicle, automobile or hazardous devices or work, while taking such medications and/or drugs; or until fully recovered from the effects of same.

It has been explained to me, and I understand that an ideal result is not guaranteed or warranted and cannot be guaranteed or warranted.

**I certify that I have read, understood, and consent to the terms put forth in this document:**
